# Aeris Company Overview

## People

- 135 people, diverse backgrounds
- > 50% in engineering
- Privately held

## Facilities

- Corporate headquarters in Silicon Valley (Santa Clara, CA)
- Locations in the UK and India
- NOCs in Santa Clara, Las Vegas, and London; Delhi under construction

## Technology

- Purpose-built network, optimized for M2M
- Supports CDMA, GSM, and LTE
- Carrier agnostic
- Global coverage with a single SIM/APN

## Markets

- Cellular connectivity for enterprise IoT programs
- IoT platform for cellular carriers
- Cloud-based application-enablement platform with best-in-class, next generation data analysis capabilities

# Aeris in Numbers

A robust history of growth, stability and industry advances

**50**  
industry  
patents

**100%**  
annual growth  
(last 4 years)

**99.995%**  
infrastructure  
reliability

Operational reach  
in **190** countries

**1 in 4**  
new cars sold in U.S.  
built by Aeris customers

**Top 10**  
No. of connected  
IoT devices

**8.7 billion**  
M2M events per day

# Business Overview

# Aeris Portfolio Overview

	Enterprise Connectivity Service	Aeris GSP	AerCloud & Analytics
What is it	<ul style="list-style-type: none"> <li>Managed cellular connectivity service (IaaS)</li> <li>Available in 190+ countries</li> <li>All technologies – CDMA, GSM, LTE</li> </ul>	<ul style="list-style-type: none"> <li>Complete M2M technology stack</li> <li>Sold as PaaS</li> </ul>	<ul style="list-style-type: none"> <li>Application Enablement Platform</li> <li>Integrated into core stack</li> <li>Cloud-based, “infinitely” scalable</li> <li>Device &amp; application analytics</li> </ul>
Target Customers	<ul style="list-style-type: none"> <li>Enterprise and M2M solutions providers</li> <li>All verticals – auto, fleet, health care, utilities, industrial</li> </ul>	<ul style="list-style-type: none"> <li>MNO’s building an M2M business</li> </ul>	<ul style="list-style-type: none"> <li>Enterprises and M2M solutions providers building apps</li> <li>MNO’s reselling service</li> </ul>
Routes to Market	<ul style="list-style-type: none"> <li>Enterprise sales team</li> <li>Telesales</li> <li>Resellers</li> <li>Self-service (launching in Oct)</li> </ul>	<ul style="list-style-type: none"> <li>Aeris MNO sales team</li> <li>Cisco OEM – IoT Cloud Connect</li> <li>Tech Mahindra resell</li> </ul>	<ul style="list-style-type: none"> <li>Enterprise sales team</li> <li>Telesales</li> <li>Self-service (launching in Jan)</li> </ul>
Competitors	<ul style="list-style-type: none"> <li>MNOs</li> <li>M2M MVNOs</li> </ul>	<ul style="list-style-type: none"> <li>Jasper</li> <li>Ericsson</li> </ul>	<ul style="list-style-type: none"> <li>Thingworx</li> <li>Axeda</li> <li>Others</li> </ul>

# Aeris Advantage

Industry's Only Network Dedicated for M2M

Service Provider

Customer Experience

MNO

Network built for smart phones and tablets  
Limited M2M features  
No M2M support expertise

Biased towards own network

Not optimized for M2M

M2M MVNO

No mobile core network  
Resell MNO data plans: expensive  
No real-time visibility, support skills

Same as carrier partner; no control

Fundamentally limited through technology approach

Aeris

Purpose-built mobile core network for M2M  
Leading visibility, control, TCO  
Optimized features: SMS Direct, eCall, AerTap, and others

Optimized for maximum coverage

Superior coverage, reliability, and TCO

# Coverage and Reliability

Optimized for maximum coverage across both CDMA, GSM

CDMA

Optimized for coverage  
across 52 carriers in  
North America  
Inherent redundancy

GSM

Single SIM across  
550 Carriers  
Over 190 countries  
Single global APN

## Enhanced Service Selection

- Customer-optimized preferred roaming list
- Supported in multiple radios
- Key differentiator with indoor coverage environments

## Redundant Carriers Access

- Access to multiple carriers in many countries
- Customer driven ability to choose/block carriers

# Neo™ – Self service connectivity, launched in Q4'14

Platform capabilities drive dramatic improvements in delivery cost and cycle time

POWERED BY AERIS

IoT Connectivity SIM Management Pricing Success Stories Partners Resources & Blog Support **Sign-Up**

## Neo: The Fast Lane to IoT

Get connected for \$1/month

- ✓ No volume commitment
- ✓ No minimum term
- ✓ No setup or cancellation fees
- ✓ Self-Managed IoT

**Get started by estimating your SIMs cost**

**LEARN MORE**

## SELF-SERVICE CONNECTIVITY IN 3 EASY STEPS

**1** Check our [coverage map](#) and package details

**2** Create an account and order your SIMs

**3** Receive your SIMs and start building and operating your solution

# Jumpstart IoT: Planning an Operator's Success

Addressing an Operator's most stubborn challenges: Effective Market Entry

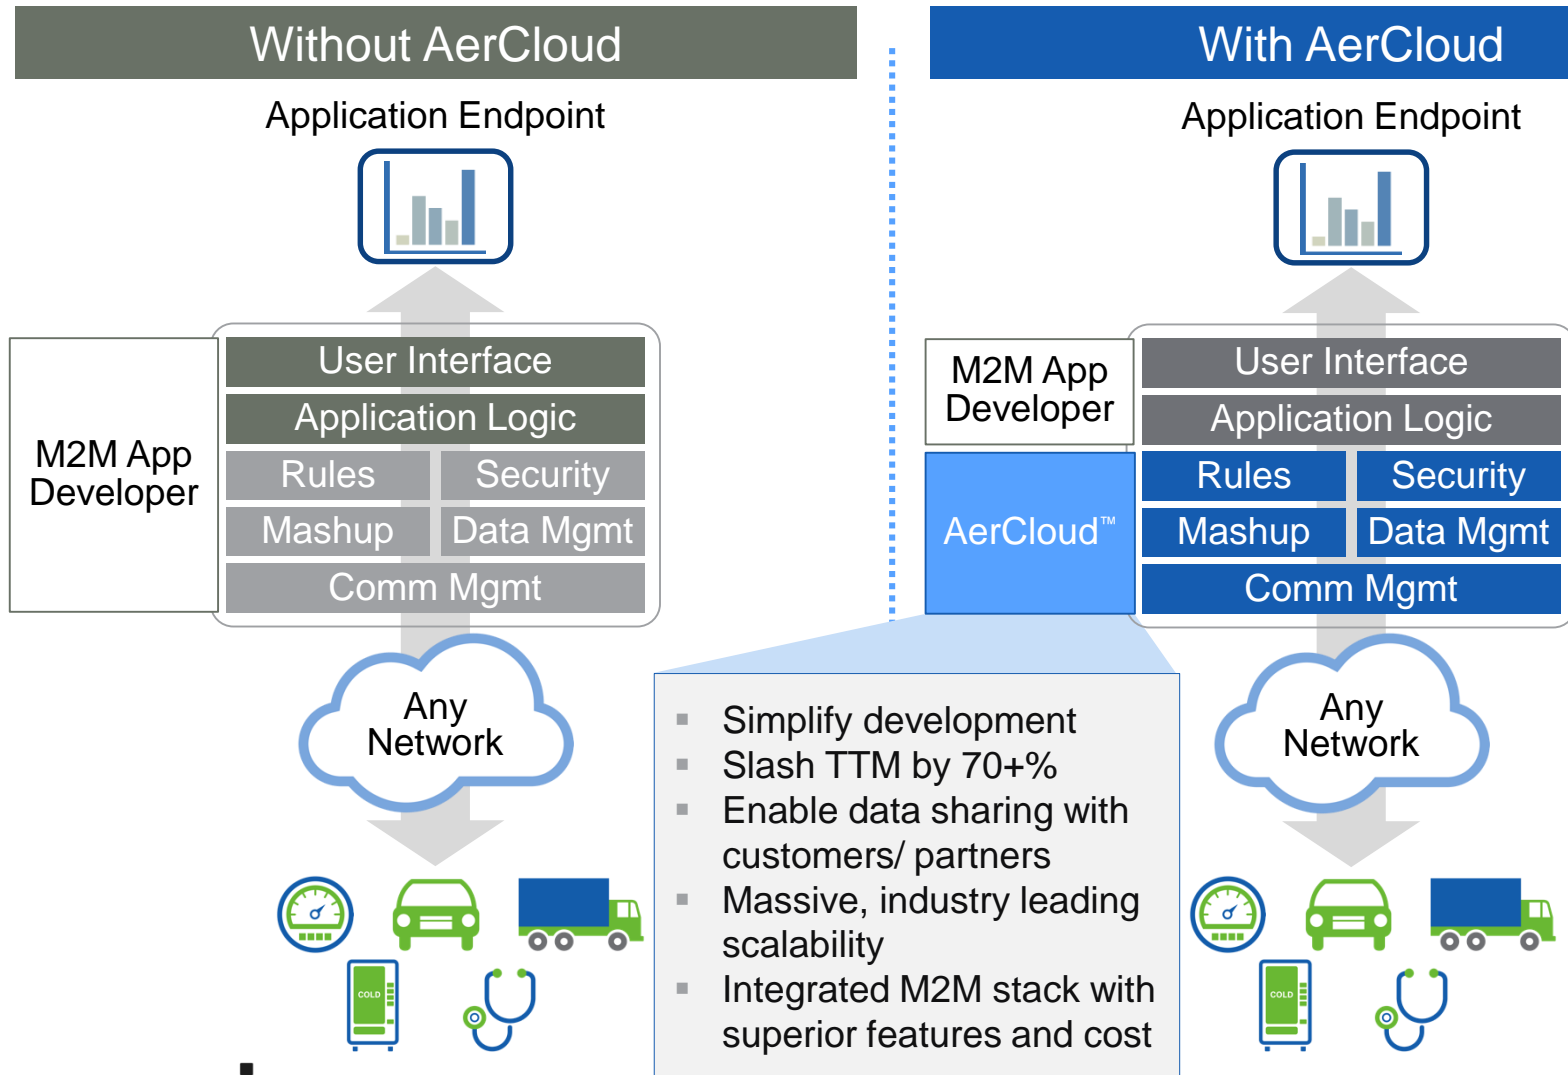

*Jumpstart IoT* combines:

- Aeris's flexible, low cost service delivery platform
- Tech Mahindra IoT applications and customization capabilities
- MNO's sales, marketing and wireless services reach

*A jointly developed and structured go-to-market plan to maximize the Operator's opportunity and to ensure Operator success*

# What Is AerCloud™ ?

Next generation M2M application enablement platform

# AerVoyance – IoT Analytics

Provides insight, management, control & optimization of M2M / IoT device footprint

- Enables customers to gain visibility & insight into the device, usage & billing info.
- It also enables alerts, anomaly detection & prediction providing relevant debugging & actionable info to effectively manage IoT / M2M deployment using a simple graphical interface.

## Account Dashboard

Obtain an overall view of the device portfolio including billing, usage, and status

## Visibility & Insight

Visibility into billing & usage information leveraging simple graphical interface

## Analytics

Analyze billing & usage data enabling account admin to manage cost and devices.

## Diagnostics

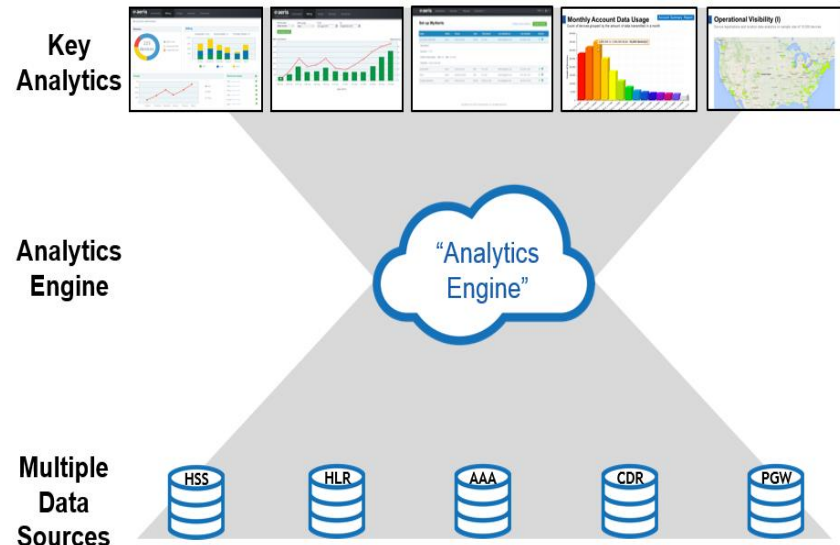

Root cause and fix issues related to billing, usage and behavior of devices

## Anomaly & Alerts

Bubble up and present key anomalies and learn from user reaction and feedback

## Prediction & Action

Learning engine to predict device behavior for pre-emptive action

# Why Does Aeris Win?

Coverage and  
Reliability

Automotive

Fleet

Health

Monitoring

Utilities

# Value in action

- Full Verizon and Sprint footprint
- Ability to select strongest signal
- Increased success rates by 5% over OnStar comparison

- Aberrant devices found during ramp
- Early identification of product issue
- SW change avoided 1M unit recall

- Enabled new business model
- Moved to cellular at each meter
- Competitors forced to follow

- Devices flipping between towers
- Early identification of battery life issue
- PRL updates to resolve and avoid 20K truck rolls
